14	Total Net Cash Outflows		2,814,422.4		2,639,902.5		2,543,792.3		2,436,269.9	
15	Liquidity Coverage Ratio (%)		137.95%		145.58%		153.22%		140.12%	

* The average weighted and unweighted amounts are calculated taking simple average based on daily observation for the respective quarters.

The Liquidity Coverage Ratio (LCR) is one of the Basel Committee's key reforms to develop a more resilient banking sector. The objective of the LCR is to promote the short-term resilience of the liquidity risk profile of banks. It does this by ensuring that banks have an adequate stock of unencumbered high-quality liquid assets (HQLA) that can be converted easily and immediately into cash to meet their liquidity needs for a 30 calendar day liquidity stress scenario. The LCR is expected to improve the banking sector's ability to absorb shocks arising from financial and economic stress, whatever the source, thus reducing the risk of spillover from the financial sector to the real economy.

The Liquidity Risk Management of the Bank is governed by the Asset Liability Management (ALM) Policy approved by the Board. The Asset Liability Committee (ALCO) is a decision-making unit responsible for implementing the liquidity and interest rate risk management strategy of the Bank in line with its risk management objectives and ensures adherence to the risk tolerance/limits set by the Board. In order to determine cash outflows, the Bank segregates its deposits into various customer segments, viz Retail (which include deposits from individuals), Small Business Customers (those with deposits under ₹ 5 crore), and Wholesale (which would cover all residual deposits). Within Wholesale, deposits that are attributable to clearing, custody, and cash management services are classified as Operational Deposits. Other contractual funding, including a portion of other liabilities which are expected to run down in a 30 day time frame are included in the cash outflows. These classifications, based on extant regulatory guidelines, are part of the Bank's LCR framework, and are also submitted to the RBI.

The LCR is calculated by dividing a Bank's stock of HQLA by its total net cash outflows over a 30-day stress period. The guidelines for LCR were effective January 1, 2015, with the minimum requirement at 60% which have risen in equal annual steps to reach 100% on January 1, 2019. This graduated approach was designed to ensure that the LCR could be introduced without material disruption to the orderly strengthening of banking systems or the ongoing financing of economic activity. The present requirement, as on March 31, 2021 is 90% (As a measure to address the current pandemic situation, RBI had reduced the minimum LCR requirement from 100% to 80% which is to be gradually restored back in two phases, i.e., 90% by October 1, 2020 and 100% by April 1, 2021)

In the Indian context, the run-off factors for the stressed scenarios are prescribed by the RBI, for various categories of liabilities (viz., deposits, unsecured and secured wholesale borrowings), undrawn commitments, derivative-related exposures, and offset with inflows emanating from assets maturing within the same time period. Given below is a table of run-off factors and the average LCR maintained by the Bank quarter-wise over the past two years:

Particulars	Run-off factors
Retail Deposits	5% - 10%
Small Business Customers	5% - 10%
Operational deposits	5% - 25%
Non-financial corporates, sovereigns, central banks, multilateral development banks, and PSEs	40%
Other legal entities	100%

Quarter ended	LCR Maintained (Average)	LCR Requirement
March 31, 2021	137.95%	90.00%
December 31, 2020	145.58%	
September 30, 2020	153.22%	80.00%
June 30, 2020	140.12%	
March 31, 2020	132.43%	100.00%
December 31, 2019	140.33%	
September 30, 2019	132.53%	
June 30, 2019	125.51%	
March 31, 2019	117.66%	

The average LCR for the quarter ended March 31, 2021 was at 137.95% as against 132.43% for the quarter ended March 31, 2020, and well above the present prescribed minimum requirement of 90%. The average HQLA for the quarter ended March 31, 2021 was ₹ 3,882,615.9 million, as against ₹ 2,821,520.7 million for the quarter ended March 31, 2020. The composition of government securities and treasury bills in HQLA stood at 90%.

For the quarter ended March 31, 2021, derivative exposures (net of cash inflows) / collateral requirements and undrawn commitments constituted just about 0.2% and 2.4% respectively of average cash outflow. The Bank has consistently maintained a robust funding profile with a significant portion of funding through deposits. As of March 31, 2021 the top 20 depositors comprised of 4% of total deposits indicating a healthy and stable deposit profile.
